Project Title: Ramen Website

I'd like to build this site as multiple page. Typical site navigation probably across the top. The content are enough to separate to distinct sections for better navigation.

- **Home Page/Introduction** – Briefly define what ramen is, its origins, and how it has evolved today to give readers basic context.
- **History** – Explore and dive deep into ramen's historical roots and how it became a key part of Japanese cuisine.
- **Ingredients** – Break down the typical components of ramen—broth, noodles, toppings—and their roles in flavor and texture.
- **Regional Variation** – Highlight how ramen differs across Japan, shaped by local tastes, ingredients, and traditions.
- **Sources** – this page will just list sources, including the Wikipedia page, as well as other sources for photography, and any other credits that need to be provided.
